CSHB 522, A bill to be entitled An Act relating to adoption and operation of requirements regarding health benefit plan identification cards.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. Title 8, Insurance Code, is amended by adding Subtitle J to read as follows:

SUBTITLE J. HEALTH INFORMATION TECHNOLOGY
CHAPTER 1660. ELECTRONIC DATA EXCHANGE
SUBCHAPTER A. GENERAL PROVISIONS

Sec. 1660.001. FINDINGS AND PURPOSE. (a) The legislature finds that patients deserve accurate, instantaneous information about coverage and financial responsibility to make well-informed decisions about their treatment and spending.

(b) The legislature finds that the ability of health benefit plan issuers and administrators to exchange eligibility and benefit information with physicians, health care providers, hospitals, and patients will ensure a more efficient and effective health care delivery system.

(c) The legislature finds that electronic access to eligibility information will reduce the amount of time and resources spent on administrative functions, prevent abuse and fraud, streamline and simplify processing of insurance claims, and increase transparency in premium cost and health care cost.

(d) The legislature finds that patients often request information about their health care coverage from their health care providers and that health care providers therefore need access to real-time information about their patients' eligibility to receive health care under the health benefit plan, coverage of health care under the health benefit plan, and the benefits associated with the health benefit plan.

(e) The legislature finds that adoption of technology by insurers, health maintenance organizations, and health care providers to facilitate use of electronic data exchange standards currently available will make coverage and health care electronic transactions more predictable, reliable, and consistent.

Sec. 1660.003. APPLICABILITY. (a) This chapter applies only to a health benefit plan that provides benefits for medical or surgical expenses incurred as a result of a health condition, accident, or sickness, including an individual, group, blanket, or franchise insurance policy or insurance agreement, a group hospital service contract, or an individual or group evidence of coverage or similar coverage document that is offered by:

No. 482, Acts of the 80th Legislature, Regular Session, 2007, or similar legislation that enacts a provision that establishes a fee on a retail electric provider related to the number of customers the provider gains in a given period, notwithstanding any law dedicating that fee revenue for a particular purpose, that fee revenue may be appropriated for use by the Public Utility Commission of Texas for a demonstration project grant program under Section 39.914, Utilities Code, as added by this Act.

(c) This section expires December 31, 2010.

SECTION _____. Subchapter Z, Chapter 39, Utilities Code, is amended by adding Section 39.9032 to read as follows:

Sec. 39.9032. INTERCONNECTION OF DISTRIBUTED RENEWABLE GENERATION. (a) In this section:

(1) "Distributed renewable generation" means electric generation with a capacity of not more than 2,000 kilowatts provided by a renewable energy technology, as defined by Section 39.904, that is installed on a retail electric customer's side of the meter.

(2) "Distributed renewable generation owner" means the owner of distributed renewable generation.

(3) "Interconnection" means the right of a distributed renewable generation owner to physically connect distributed renewable generation to an electricity distribution system, and the technical requirements, rules, or processes for the connection.

(b) A transmission and distribution utility or electric utility shall allow interconnection if:

(1) the distributed renewable generation to be interconnected has a five-year warranty against breakdown or undue degradation; and

(2) the rated capacity of the distributed renewable generation does not exceed the service entrance capacity.

(c) A customer may request interconnection by filing an application for interconnection with the transmission and distribution utility or electric utility. Procedures of a transmission and distribution utility or electric utility for the submission and processing of a customer's application for interconnection shall be consistent with rules adopted by the commission regarding interconnection.

(d) The commission by rule shall establish safety, technical, and performance standards for distributed renewable generation that may be interconnected. In adopting the rules, the commission shall consider standards published by the Underwriters Laboratories, the National Electric Code, the National Electric Safety Code, and the Institute of Electrical and Electronics Engineers.

(e) A transmission and distribution utility, electric utility, or retail electric provider may not require a distributed renewable generation owner whose distributed renewable generation meets the standards established by rule under Subsection (d) to purchase an amount, type, or classification of liability insurance the distributed renewable generation owner would not have in the absence of the distributed renewable generation.

(f) A transmission and distribution utility shall make available to a distributed renewable generation owner for purposes of this section metering required for services provided under this section, including separate meters that measure the load and generator output or a single meter capable of measuring separately in-flow and out-flow at the point of common coupling meter point. The distributed renewable generation owner must pay the differential cost of the metering unless the meters are provided at no additional cost. Except as provided by this section, Section 39.107 applies to metering under this section.

(g) A renewable energy credit that is earned by a distributed renewable generation owner through the interconnection of a renewable electric system is the sole property of the distributed renewable generation owner unless the distributed renewable generation owner engages in a transaction to sell or trade the credit under Section 39.904.

(h) A transmission and distribution utility, an electric utility or retail electric provider shall provide for net metering and may contract with a distributed renewable generation owner so that:

(1) surplus electricity produced by distributed renewable generation is made available for sale to the transmission grid and distribution system; and

(2) the net value of that surplus electricity is credited to the distributed renewable generation owner.

(j) For distributed renewable generation owners in areas in which customer choice has been introduced, the distributed renewable generation owner must sell the owner's surplus electricity produced to the retail electric provider that serves

the distributed renewable generation owner's load at a value agreed to between the distributed renewable generation owner and the provider that serves the owner's load. Without limiting any mutually agreed commercial arrangement, the agreed value may be based on the clearing price of energy at the time of day that the electricity is made available to the grid or may be a credit applied to an account during a billing period that may be carried over to subsequent billing periods until the credit has been redeemed. The independent organization identified in Section 39.151 shall develop procedures so that the amount of electricity purchased from a distributed renewable generation owner under this section is accounted for in settling the total load served by the provider that serves that owner's load by January 1, 2009. A distributed renewable generation owner requesting net metering services for purposes of this section must have metering devices capable of providing measurements consistent with the independent organization's settlement requirements.

SECTION _____. Section 39.9032, Utilities Code, as added by this Act, takes effect January 1, 2009.
